1	CRANBURY TOWNSHIP PLANNING BOARD	1	CHAIRMAN MAVOIDES: Call this
2	23A NORTH MAIN STREET CRANBURY, NEW JERSEY		
3	WEDNESDAY, OCTOBER 16, 2019 Commencing at 7:01 P.M.		meeting to order.
4		3	Please rise for the Pledge of
5) TRANSCRIPT RE:) OF		Allegiance.
6) PROCEEDINGS 2019 DRAFT MASTER PLAN)	5	(Whereupon, Pledge of Allegiance was
7	REEXAMINATION REPORT PUBLIC) HEARING		recited, Statement of Adequate Notice was read and
8)	7	roll call was taken.)
		8	CHAIRMAN MAVOIDES: So the sole
9	BEFORE:		agenda item for tonight is to review the 2019
10	PETER MAVOIDES, Chairman		master plan reexamination report that's been posted
	MICHAEL KAISER, Vice Chairman GLENN JOHNSON, Mayor Designee		to the town's website and prepared by Richard
12	DANIEL P. MULLIGAN, III, Board Member JAMES GALLAGHER, Board Member		Preiss and any public comment on that document
13	KAREN CALLAHAN, Board Member		before the planning board considers that for
14	RICHARD PREISS, P.P., Board Planner A. ANDREW FERANDA, P.E., P.T.O.E, C.M.E., Board	14	adoption.
15	Engineer JOSETTE C. KRATZ, Land Use Administrator/Secretary	15	So at this point in time I will turn
16	C, Land ODG Imministrator, Secretary	16	it over to Richard to kind of run through his
17		17	\mathcal{E}
18	MIGHELLE B. MILGOV. C.C.B.	18	high level the document.
19	MICHELLE D. WILCOX, C.C.R. LICENSE NO. XI01745	19	Richard?
20		20	MR. PREISS: Thank you very much.
21		21	So I'm Richard Preiss. I am the
22		22	township planner, and our firm worked alongside
23	M. VIRGINIA GUINTA CERTIFIED COURT REPORTERS	23	Andy Feranda from Shropshire who is the traffic
24	POST OFFICE BOX 184 ROCKY HILL, NEW JERSEY 08553	24	consultant, I know you are all familiar with him,
25	Mvg2946619@aol.com (609) 477-9342	25	on doing the master plan reexamination that's
	Page 2		Page 4
1	INDEX	_	1.6
2			before you before the planning board.
3	WITNESS PAGE	2	If you recall, we had a community
4			meeting in this room in April, 2019 before it
5			really got started very far on the master plan so
6			that we could take input from the members of the
7			public, and we have taken that feedback very
8			seriously in the draft of the master plan
9			reexamination. At the end there is a summary of
10			all the comments that were made by all of the
			groups that participated in that meeting.
11	EXHIBITS	11	(Whereupon, Mr. Andrew Feranda
12			enters the proceedings.)
13	NUMBER DESCRIPTION PAGE	13	MR. PREISS: We also felt it
14			necessary to correct a couple of misconceptions or
1		1	statements which were made at that meeting that
15	(None)		-
16	(None)	16	were not correct. We felt that the record should
16 17	(None)	16 17	were not correct. We felt that the record should be correct on that. And so also right after that
16 17 18	(None)	16 17 18	were not correct. We felt that the record should be correct on that. And so also right after that recitation of what was said at the community
16 17	(None)	16 17 18 19	were not correct. We felt that the record should be correct on that. And so also right after that recitation of what was said at the community meeting we also have a short section which talks
16 17 18	(None)	16 17 18 19 20	were not correct. We felt that the record should be correct on that. And so also right after that recitation of what was said at the community meeting we also have a short section which talks about those issues.
16 17 18 19	(None)	16 17 18 19 20 21	were not correct. We felt that the record should be correct on that. And so also right after that recitation of what was said at the community meeting we also have a short section which talks about those issues. So not only is it a part of the
16 17 18 19 20	(None)	16 17 18 19 20 21 22	were not correct. We felt that the record should be correct on that. And so also right after that recitation of what was said at the community meeting we also have a short section which talks about those issues. So not only is it a part of the master plan reexamination report but as we work
16 17 18 19 20 21	(None)	16 17 18 19 20 21 22 23	were not correct. We felt that the record should be correct on that. And so also right after that recitation of what was said at the community meeting we also have a short section which talks about those issues. So not only is it a part of the master plan reexamination report but as we work through the document, we made sure that we went
16 17 18 19 20 21	(None)	16 17 18 19 20 21 22 23 24	were not correct. We felt that the record should be correct on that. And so also right after that recitation of what was said at the community meeting we also have a short section which talks about those issues. So not only is it a part of the master plan reexamination report but as we work through the document, we made sure that we went back and we looked at those comments and we took
16 17 18 19 20 21 22 23	(None)	16 17 18 19 20 21 22 23 24	were not correct. We felt that the record should be correct on that. And so also right after that recitation of what was said at the community meeting we also have a short section which talks about those issues. So not only is it a part of the master plan reexamination report but as we work through the document, we made sure that we went

Page 5

1 recommendations and their suggestions.

So Andy Feranda, who has just

3 arrived, is the traffic consultant who's going to

4 talk about the circulation.

So just a little bit of background.

6 The main purpose of the meeting this evening is

7 really to hear from you, the residents, all those

of you who have an interest in Cranbury.

Just for everybody's background,

10 once again, we did a very comprehensive master plan

11 back in 2010. And under the Municipal Land Use

12 Law, you are required to either do a new master

13 plan or reexamine the master plan every ten years.

14 So earlier this year the mayor, township committee,

15 planning board indicated it was time to take a look

16 at that again.

And what we did after putting our

18 heads together, we said, you know, a lot of -- some

19 things have changed in Cranbury, but basically the

master plan from 2010 is still a document which

sets out the policy and the direction and the guide

for growth, and that rather than do a whole new

3 master plan we would do a reexamination.

So let me just explain kind of the

25 mechanics of that.

1 things that should be reaffirmed, things that

2 should be changed. So they had a role.

So as a result, even though this

4 master plan reexamination is going to be adopted by

5 the planning board, we created what is known as a

6 master plan reexamination subcommittee. We had two

7 members of the township committee, two members of

8 the planning board and two members of the zoning

9 board and myself, and we brought in Andy, for

10 example, and other of the township consultants as

.1 we needed them.

We also made ourselves available to those other boards or commissions that are in town

14 that expressed an interest in talking to us. So we

15 met with the environmental commission. We met with

16 the historic preservation commission, and they had

17 specific recommendations, many of which are

18 included in this master plan reexamination.

So let me just talk about the format

20 of a master plan reexamination.

So if any of you have read the last

master plan, there is a section of sort of an

23 introduction. There's some goals and objectives

24 and then it has various elements. There is land

25 use and circulation, utilities, conservation, so

Page 6

Page 8

Ultimately, the adoption of a masterplan is the responsibility of the planning board.

3 Hence, the planning board is having this meeting

4 this evening. And if all goes well and we're able

5 to finalize the document, we should have a hearing

6 on adoption maybe as soon as the first meeting in

7 November.

But what we found, we did this in

9 2010, even though it is a planning board's

10 responsibility, the result of a master plan is it

11 very often makes recommendations for changes to the

12 zoning map or changes in the zoning ordinance, and

that's only a function that the township committee

14 as the governing body can do.

So you don't want to have the

planning board go off and work on its own and

17 propose all sorts of recommendations that the

18 township committee has no interest in following,

19 adopting or at least considering. So we decided

20 that they should be a participant.

We also feel that the zoning board

22 has a significant contribution because they are the

23 ones that get applications for variances. So they

24 have an idea of what -- you know, what about the

25 zoning ordinance or the master plan is problematic,

1 forth. There is lots of maps and, you know, other 2 illustrations.

When you do a reexamination -- a

4 master plan you have a great deal of sort of

5 flexibility and you can choose to go in any

6 different directions.

7 When you do a reexamination,

8 Municipal Land Use Law basically says there is four

9 steps that are mandatory that you must undertake,

10 and we've certainly done that. And if you look at

11 the handout, it says the format of the

12 reexamination report, the four steps.

Essentially, the four steps involve

14 kind of looking back, assessing where you are and

then kind of looking forward.

So the actual format indicates that

17 the first thing you do is you look back at the last

18 master plan and then you just set forth what the

19 objectives and problems are.

If you've just come in, the handout is basically the format for tonight's presentation.

And then the second part of it is

23 you have to provide an indication of the extent to

24 which those problems and objectives have been met.

The third one is if there have been

25

Page 9

1 changes in the underlying assumptions or policies

2 over the last ten years, those should be stated.

And then finally, the last chapter

4 is if there are any recommendations for changes

5 either in the master plan or the land use

6 regulations, that is where that is located.

So we have provided the master plan 8 reexamination report in that format. I think the

9 thing that everybody is interested in is the last 10 section, which is on the recommendations. So I

11 think the focus of our presentation, the thing we'd

like to hear most about from the residents, is on

the recommendations, themselves.

Obviously, if you have questions 14

about any of the other sections or comments about 15

that, we are happy to talk about that as well. 16

So one of the things that I would 17

like to point out in particular in Cranbury's case

and one of the reasons why a master plan

reexamination was done is if you go to page --

those of you who had an opportunity to look at the

22 report, Page 39 and 40, we put together a chart

23 which said, here are all the recommendations that

24 were in the 2010 master plan. And in total, in

25 terms of actual recommendations, not just policy

1 So I think Cranbury has been true to its -- to

2 following the master plan, to the extent possible,

and implementing what was in the 2010 master plan.

4 And one of the things that I'll say

is that the 2010 master plan reaffirmed a lot of

the policies that go back to the early nineties and

even in the eighties. I think the more I work in

Cranbury, the more I realize that the vision that

was set forth by the people who were guiding growth

and development in the 1980s, those were very smart

people and they put a great plan together. And

essentially, what has happened since then is we've

followed those overall recommendations to a great

extent and we've made some changes along the way.

We had to do that in 2010, and no doubt there will

be some changes that will be necessary in the

17

Anyway, having said that, let me

just quickly go down the recommendations from the

2010 master plan.

I'm going to leave land use to the 21

end of my presentation and I'm going to turn it

over to Andy to talk about the recommendations

related to circulation.

25 But just very briefly, the goals and

Page 10

Page 12

1 items, there were twenty-five in total. And what

2 we're able to catalogue is that nineteen of those

3 were actually achieved. We basically went and

4 implemented those recommendations.

Three of them were partially 6 achieved. In other words, we took steps to

7 implement them, although, for example, in the case

8 of, for example, the scenic vistas protection

9 ordinance, that's been drafted but it hasn't been

10 adopted.

So in addition to the nineteen that 11 12 were achieved, we made progress on three of them.

And three of them, you know, have not been

14 undertaken and I think in all -- in one case it's

probably not something that will take place in the

16 future, but the other two, which are dealing with

the scale of single family homes, and the other one

is -- sorry, I'm trying to find it. There is

another one, you know -- those are things that were

probably -- that have been affirmed and we've

suggested that those be implemented. 21

So I've been doing this for close to 22

23 forty years now. And it's really remarkable, very

24 often master plans have a lot of recommendations

25 and you will be lucky if you get half of them done.

1 objectives, we looked at those. Aside from the

ones that have been achieved, a lot of the goals

and objectives we had were very specific of those

being achieved. Essentially, the master plan

reexamination reaffirms those past goals and

objectives.

With respect to many of the elements

of the 2010 master plan, when it comes to

conservation, for example, community facilities,

economic development, utilities, agricultural

preservation, recycling, most of those are an

affirmation of the directions and policies, with

some additional small recommendations. But

essentially, there is no major initiatives there.

With regard to historic

preservation, some changes are necessary, and this

master plan reexamination has set them forth. 17

When we met with the HPAC, they

indicated that they thought that it was -- it

should be -- it was necessary and advisable and

appropriate to maybe expand the number of

properties in the downtown historic district.

There was also an indication that they wanted to

24 change the historic buffer, to actually reduce 25 that. And there was also a notion of maybe

15

Page 13

- 1 designating individual properties outside of the
- 2 downtown as historic so that they would also be
- 3 subject to the HPAC requirement. So those
- 4 initiatives have been set forth in the master plan
- 5 reexamination.
- 6 One of the other interesting things
- 7 that came up when we had the community meeting back
- 8 in April of this year, we had a contingent from
- 9 Cranbury Station Hamlet and there was a lot of
- 10 feedback that the residents there and those who
- 11 live there and in the surrounding area felt it was
- 12 a historic area. And so one of the things to help
- 13 protect that is one of the recommendations is to
- 14 have the HPAC look at that area and maybe designate
- 15 that as a historic district to help with its
- preservation and to protect it. So that is also a
- 17 recommendation.
- 18 With regard to the green and
- sustainability element, we had a lot of input from
- 20 the environmental commission. They have a very
- 21 ambitious program to look into a number of
- 22 initiatives. And essentially, this master plan
- 23 reexamination endorses that. So we are very happy
- 24 that the environmental commission in the future
- 25 will be looking into those. And so a lot of those

- 1 that when the Cranbury Service Center moved from
- 2 the circle to Hightstown-Cranbury Station Road,
- 3 they left their property in disarray. It is an
- 4 eyesore right at a key gateway into the community.
- 5 And I think one of the recommendations is to do an
- 6 investigation whether that property should be
- 7 declared an area in need of redevelopment to aid
- 8 its redevelopment and to basically clean up that
- 9 site. So that is something we are recommending.

There are also recommendations that

- 11 came out of work that was undertaken by the zoning
- 12 committee to essentially look at outdoor storage
- 13 regulations and see if those can be loosened up.
- 14 We know that a number of businesses would look
- 15 favorably upon that. Obviously, it would have to
- be done in a manner that doesn't have negative
- 17 impacts.

10

18

Also, possibly to allow landscaping

- **19** businesses in town.
- Another recommendation is to look at
- 21 the area south of Brick Yard Road,
- 22 Hightstown-Cranbury Station Road, which is an area
- 23 where there is a concentration of industrial uses
- 24 that are slightly more manufacturing and have more
- 25 impacts than what is typically found in the light

Page 14

Page 16

- 1 initiatives we would encourage the environmental
- 2 commission to look into that in greater detail to
- 3 assess the feasibility and to advise both the
- 4 planning board and the township committee about
- 5 what they would recommend and to provide more
- 6 specific recommendations if there is a need to make
- 7 changes to the master plan and, particularly, to
- 8 the existing regulations in the land development
- 9 ordinance.
- So those are the -- aside from land
- 11 use and circulation, those are the major
- 12 recommendations.
- With regard to land use, I won't go
- 14 through each of them in great detail, but there are
- .5 a number of things that were specifically
- 16 recommended. I'll just briefly mention them.
- The first is that to amend bulk
- 18 regulations for accessory structures for single
- 19 family homes. This is something that the township
- 20 committee took up this year and wasn't able to
- 21 follow through and get a consensus. But there is I
- 22 think a need to reexamine those and to make them
- 23 more reasonable and appropriate in residential
- 24 areas of the community.
- One of the things that came out is

- 1 industrial districts. That seems to be an area
- 2 where they have tended to congregate. And the
- 3 question is, you know, do we adopt a different
- 4 zoning designation, one that would refer to some of
- 5 it as a medium industrial use and allow them to
- 6 flourish there and to have other like businesses to
- 7 be located there.
- 8 Another recommendation is to look at
- 9 the off-street parking requirements in the village
- 10 commercial zone, kind of a recognition of the fact
- 11 that many businesses can provide off-site parking
- 12 that the zoning requires, and rather than make
- 13 somebody who is coming into the downtown go through
- 14 the process of having to seek a variance is
- 15 basically to allow them to come in and establish
- 16 themselves without having to provide any additional
- 17 off-site parking.
- We've had a lot of applications in
- 19 the industrial zones to put security fencing in,
- 20 and the planning board has allowed that in many
- 21 situations and I think it's time to kind of put
- 22 regulations in place which would standardize
- 23 location, screening materials that would be used. 24 So that is another recommendation.
- Also, you know, as time goes by, and

Page 17

- 1 it happened since the last master plan, there are
- 2 often necessities to revise certain regulations in
- 3 the land development ordinance. You don't
- 4 necessarily know what they are, but we wanted to
- 5 recognize in the master plan, to the extent that,
- 6 you know -- and, for example, with regard to
- 7 changing the bulk regulations for accessory
- 8 structures, that is an example of, you know,
- 9 something comes to the attention of the planning
- 10 board or the township committee. And so we
- 11 recognize that that's likely to happen in the
- 12 future and so we recognize that it is appropriate
- to deal with those as well.

There is also probably a necessity 14

- at some point to reorganize and to restructure the 15
- land development ordinance. What we found is that,
- for example, with the signage regulations, some are
- in the district regulations, themselves, some are
- in the site plan standards, some are in the
- industrial or residential design standards. So
- what we often find is developers that, you know,
- come into Cranbury often miss the regulations that
- are, you know, appropriate and applicable to them.
- So there is probably a need to 24
- 25 reorganize and consolidate certain sections. It

- 1 Cranbury is really the village and the surrounding
- 2 area, and then once you go beyond the hard edge of
- 3 the village boundaries, you get into the
- 4 agricultural, farmland preservation area on the
- west side, on the east side the industrial area.
- And essentially, allowing a residential community
- out that far from the downtown, it's far from the
- school, it's far from community facilities and
- services and it's far from the other residents who
- live in Cranbury. So I think for that reason, in
- particular, the notion was to retain the industrial

12 zoning.

We also felt that there are 13

14 residents, and we recognize that it's a major issue

- 15 for them, who are exposed to industrial development
- and traffic out there. But simply adding
- additional residential development means those new
- residents would be, likewise, exposed to that.

So at the end of the day, after a 19

serious amount of discussion, the retention of the 20

zoning plan, not just there but throughout

Cranbury, is the recommendation.

So those are the major

24 recommendations of the elements of the 2010 master

25 plan which I am familiar with.

Page 18

Page 20

- 1 wouldn't change any of the underlying zoning 2 designations, but just make it a document that is 3 easier to navigate.
- One of the things that we felt that
- 5 was really necessary to address, even though it's
- 6 not a recommendation for change, is retention of
- the current zoning east of the New Jersey Turnpike.
- For those of you who were at the
- 9 community meeting in April, there was a contingent
- 10 of residents, and Monroe residents as well, who had
- 11 indicated that they would support the rezoning of a
- 12 particular parcel from industrial to residential. 13 And this is something that the planning board
- 14 looked at very carefully, the subcommittee looked
- 15 at very carefully. It's not the first time that it
- was looked at. We looked at it in 2010. We looked
- at it when we did the Housing Element and Fair
- Share Plan back around 2006, and we looked at it
- **19** again in 2016. And essentially, the conclusion of 20 21 the planning board and the subcommittee is to 22 continue the policy of having industrial in that 23 area. The main reason for doing so is that any 24 time we've considered that residential zoning, 25 there is a recognition that really the heart of

- I'll turn it over to Andy, and then after Andy is done, we will have -- you'll have an opportunity. This is an informal meeting. So it's not necessary for you to be sworn in, as you would in the case of a site plan application or a formal hearing. But we'd like you to come up to the microphone. Please, for the purposes of -- so that we can follow the comments, if you could identify yourself and give your address so we know where you live, that would be helpful. And then if there is a question, you know, we'll see if we can answer it. And if there is a comment, we will take that
- under advisement. And following this meeting, to the extent that it's necessary, we will make whatever changes or, to the extent necessary, to the master plan reexamination. 17
- So without further ado, I'll turn it 18 over to Andy to talk about the circulation, and then we'll open it up for questions and comments.
- CHAIRMAN MAVOIDES: Thank you. 21
- MR. FERANDA: Good evening. I'm 22 here to talk about the circulation element. By the
- 24 circulation element, we're talking about the
- 25 streets and intersections.

Page 21

- Specifically we're looking at the
- 2 village center east, which is mostly the
- 3 commercial. There is residential as well. Village
- 4 center being Main Street, a north/south road,
- 5 Route 130 is a north/south Road. Commercial
- 6 traffic travels through these areas. There are
- 7 constraints on circulation. Again, we've looked at
- 8 this in the past under the master plan, 2010 master
- 9 plan. The constraints north/south are that you
- 10 have Cranbury Lake and you have the brook. There
- 11 are only two crossings of that waterway. There is
- 12 Main Street and the commercial crossing is
- 13 Route 130. Otherwise, you have east/west traffic.
- North of the brook and the lake
- 15 there are other sections of roadway. You have
- 16 South River Road which heads north/south as well.
- 17 You have Liberty Way which heads north from Half
- 18 Acre Road. This presents issues with the
- 19 commercial development, the warehouse development,
- 20 the office that's on the east side. We've
- 21 monitored that. Development has grown in those
- 22 areas.
- In the new reexamination we looked
- 24 at the roads and intersections. There are nine
- 25 roads we considered, actually seven in the

- 1 improves the circle will be a good alternative.
- 2 There are safety concerns out there. We did an
- 3 evaluation of accidents and it is one of the hot
- 4 spots in the state for accidents, based on the
- 5 multiple approaches to the circle and being -- to
- 6 cross over you have to get in the circle.
- 7 Commercial vehicles are using the circle for
- 8 crossing over.
- 9 So that is an area that's actively
- 10 being monitored and we expect improvements. DOT
- 11 works slowly. So we can't expect improvements in
- the near future. I cannot give any estimate as to
- 13 timeframes when it comes to the DOT. But I do know
- 14 they are actively reviewing the circumstances of
- 15 the -- how to improve that intersection or the
- 16 circle.
- Liberty Way has been constructed in
- 18 pieces. This is something that has been
- 19 recommended for many years, but we have
- 20 considerable constraints, including environmental,
- 21 cost and other constraints that -- regulatory
- 22 constraints, approvals, permitting, that would have
- 23 to be overcome, and they seem substantial at this
- 24 point.

25

We are still keeping open the door

Page 22

Page 24

- 1 commercial area, there's two others, Plainsboro
- 2 Road and Maplewood/Scott, as carryovers from the
- 3 previous master plan discussions. But really the
- 4 focus is on the southeast quadrant of Cranbury
- 5 because that's where development has occurred and
- 6 that's where the missing north/south links are.
- So we've looked at the roadways andintersections, what has been done by developers to
- 9 improve those intersections, and we've also looked
- 10 at what can be done in the future, as maybe there
- to at what can be done in the future, as maybe there
- 11 might be some more growth, but to improve the
- 12 intersections to handle the existing traffic, as
- 13 well as any future traffic.
- In the southeast section of
- 15 Cranbury, we also include the Cranbury circle.
- 16 This is an area that the DOT is actively studying
- 17 and reviewing for improvements. What those
- 18 improvements are, we are not sure yet. Replacement
- 19 of the circle is a likelihood. What that would
- 20 look like is still to be determined by the DOT.
- 21 They are likely to put out alternatives, and they
- 22 will have public presentations of what those
- 23 alternatives would be.
- Based on my experience with the
- 25 circle over many years, any alternative that

- 1 that this may at some point provide that extra
- 2 north/south capacity. It would be a benefit to the
- 3 community, to the community surrounding, because
- 4 this would be a regional improvement and allow that
- 5 additional north/south capacity to move, including
- 6 keeping the commercial traffic to the east rather
- 7 than having that traffic use 130 and adding to what
- 8 is commuter traffic, as well as commercial traffic,
- 9 that bogs the road down during commuter peak
- 10 periods.

Some of the issues with Liberty Way obviously are the bridge, which is a cost, as well

13 as environmental and permitting issue.

The southern section of Liberty Way

- 15 currently is configured as a right in/right out.16 It was done by a developer. They provided the
- 17 roadway as right in/right out to the southern
- 18 portion of the Wayfair warehouse. There are
- portion of the waytan warehouse. There are
- environmental constraints to the south of that.

 The thought is to use the signal at Old Trenton and
- 21 130 to provide additional east/west movement. And
- by that, I don't necessarily mean west heading west
- 23 from 130 to the west. What I do mean is truck
- 24 traffic that may travel on 130 that currently turns
- 25 at Station Road, fills up the left turn lane. And

Page 25

1 that has been an issue. The police chief has noted
2 that traffic backing out of the Station Road left
3 turn lane has been an issue.
4 By allowing the southern portion of
5 Liberty Way to connect to Old Trenton at a signal,
6 another left turn lane could be put in in the
7 southbound direction to allow traffic to use
8 Liberty Way from another point further south of

9 Station Road to go east.
10 We've also looked at intersections
11 within this southeast area. Some of the
12 intersections have been improved, as I've noted.

13 Station Road and Hightstown-Cranbury Station Road

14 has been improved based on -- and by improved, I15 mean there's now a signal out there where there

16 wasn't a signal. There were sight distance issues

17 based on structures along the road. Those

 ${f 18}$ structures have been removed. So there's been

significant improvements at that location. There's

also been traffic added to that location based on

21 the warehouse, the employees that would use that 22 intersection.

Also, Brick Yard Road is another

24 road that currently goes east/west from the

25 Cranbury circle over to Hightstown-Cranbury Station

1 The board will now give you the

2 opportunity to comment on this document. So at

3 this point I open it up to any public commentary or

4 questions.

5 When you come up, please, again,

6 introduce yourself, give us your address, let us

7 know specifically what element of the master plan

8 reexamination that you'd like us to address.

9 MS. LARSON: Bonnie Larson, 22

10 Cranbury Neck Road. I'm here as a member of the

11 shade tree commission.

We just want to make sure that during the planning process, the shade tree

14 commission has the capability of working with the

15 planning board before an applicant is approved,

16 because it's part of our five-year community

17 forestry plan. So that we want to have some input.

8 MR. PREISS: Great. Thank you very

19 much.

MS. LARSON: Thank you.

MR. PREISS: We certainly appreciate

22 the work that you do, and we will continue to work

23 with you on that. Thank you.

24 CHAIRMAN MAVOIDES: Please.

MR. DILLON: Good evening,

Page 26

Page 28

- 1 Road. Brick Yard Road is in disrepair and needs
- 2 improvements. And the township has worked hard to
- 3 get funding for the improvements and has obtained
- 4 some of that funding. So that in the near future,
- 5 we expect improvements to Brick Yard Road to add
- 6 some more east/west capacity to the south and that,
- 7 along with the improvements at the circle and some
- 8 improvements at Hightstown Station Road and Brick
- 9 Yard Road, will allow a distribution of traffic.
- 10 Not only will traffic use Station Road, some
- 11 traffic will then use Brick Yard Road, and there
- 12 will be distribution of traffic, allowing a release
- 13 and another means of traffic traveling in the
- 14 east/west direction.

So I am here to answer any

16 questions.

Really, the master plan is focussing on old issues, bringing those new issues up-to-date

19 based on improvements that have been made and based

20 on improvements we see for the future that will

21 help traffic, both commercial and commuter, both

22 local and regional, move through these areas as

23 efficiently and as safely as possible, so.

24 CHAIRMAN MAVOIDES: Great. Thank

25 you.

- 1 gentlemen, ladies. My name is Robert Dillon. I
- 2 live at 32 Hightstown-Cranbury Station Road. I've
- 3 been a resident of Cranbury for forty-eight years,
- 4 living in the same house.

5 You know that quite a bit has been

6 going on and I had to rassle pretty much the

7 township at different times in order to get

8 something accomplished.

The one I'm -- before I read this,

10 one of them was that the attempt to change the zone

11 south of Brick Yard Road. That zone -- when

12 Mid-State moved there Bob Jones was the engineer.

13 That zone was just zoned industrial, period. And

14 the vagueness of that is what created the problem.

In fact, the township dug the ditch

6 along the edge of the road to drain that property

.7 because it was a swamp.

And the problems that was created

was, first off, there is no buildings that they work in. All their work is done outside. That

21 created an environmental hazard, a disaster. The

22 noise from cranes running all night, and they were

running until 2 o'clock in the morning up and down.

24 They had one crane back then. Now they got six.

The concrete trucks going in and out

Page 29

- 1 of there, you know, pouring concrete for the slabs
- 2 that they make, the air pollution from the
- 3 grindings and stuff that they clean off the slabs,
- 4 that got to a point where it saturated the ground
- 5 so bad. The DEP got after them because it didn't
- 6 meet the standard for water runoff.
- All these are what I fought and what
- 8 I went to court for. And the reason that it stayed
- 9 industrial light impact and the reason why there is
- 10 no outside storage and no outside manufacturing is
- 11 because of the amount of years it took to get that
- 12 taken out of there so that you couldn't have that
- there, anywheres in the township.
- Now, to take that and reverse that
- 15 and just minimize with a little bit of outside
- storage basically puts your foot in the door with
- 17 somebody with an issue like that. That's exactly
- 18 why we got a zoning board. Let them do their job.
- 19 Don't put this on the master plan where people can
- 20 do this and then the next thing you hear is they
- 21 got a right to do it. Well, it created a problem.
- You have a zoning board. You have a lot of smart people that sit on that zoning board.
- 23 lot of smart people that sit on that zoning board.
- 24 Don't take the governing and the power to accept
- 25 and deny things out of our hands. You don't need

- 1 warehouse. That's my opinion. Okay.
- 2 It's in an industrial light impact
- 3 zone. The traffic generated by this is not
- 4 industrial or related to the term industrial light
- 5 warehousing because it requires 1500 employee car
- 6 trips and 900 truck trips daily. That was taken
- 7 from what CBY presented to the planning board when
- 8 they were trying to get this through, that that's
- 9 probably the worst-case scenario, you know, the
- 10 most busiest time, but I wouldn't guarantee it.
- 11 There was no traffic circulation plan put in place
- 12 before approvals, before these guys were put in
- there. There was hopes, but nothing. Fix the
- 14 traffic for the global retail distribution center.
 - Page 22, statement that the 130
- .6 corridor has not increased, that is a joke. The
- 17 left turn lane, as you were describing, because of
- 18 that warehouse there, they extended that left turn
- 19 lane down Route 130, and it would be north but it's
- 20 on the southbound side, so they can get more trucks
- 21 off the road, and it's still not far enough because
- 22 they are stopping in the fast lane down there. The
- 23 traffic did increase.
- I even pulled up to that traffic
- 25 light right there to make a left turn myself in my

Page 30

15

Page 32

- 1 to do that. When you do stuff and put it in like
- 2 this, such as the rezoning, such as outside
- 3 storage, you took the power away from everybody
- 4 sitting up there. You've done it.
- 5 Okay. Now, saying that, I'll read
- this statement because it's faster.
 - CHAIRMAN MAVOIDES: Thank you.
- 8 MR. DILLON: The 2010 master plan,
- 9 when it was put into effect, okay, it violated the
- 10 2010 permitted industrial warehouse zone by
- 11 allowing, this is what I call Wayfair and Amazon,
- 12 the global retail fulfillment distribution center,
- 13 that's what I call them. They are not a warehouse.
- 14 The only difference is the people don't show up
- 15 there. They got a bigger audience than anybody
- 16 else. It's on the internet.
- So they basically bring products
- 18 into that place, that fulfillment center, break
- 19 them down to where sometimes they get them shipped
- directly from a manufacturer and they ship them out
- of there. That requires a lot more people to do
- 22 that job than a normal warehouse. That requires,
- 23 you know, a lot more trucks bringing that product
- 24 in. That's where we got jammed up on this because
- 25 it created that mess with the traffic. It's not a

- 1 car and there was a truck in front of me and the
- 2 car came up in the fast lane, we just got the green
- 3 arrow, came up the fast lane and made a left turn
- 4 around that whole line of traffic and kept going.
- 5 You know, that's what it goes to.
- There is a thing here. I also
- 7 question the 425,000 and 87,000 from American
- 8 Water. I remember CBY giving 87,000. If they gave
- 9 more money since then for the betterment of Brick
- 10 Yard Road, that's news to me. I don't recall any
- 11 of that money mentioned during the presentation for
- 2 the CBY/Viridian development.

The best alternative that Cranbury

- 14 has is to connect the CBY/Viridian/Amazon site to
- 15 the Old Trenton Road light. If you just put that
- into Liberty Way without hooking the 2.8 or 2.7
- 17 square foot distribution centers there, it's
- useless. It's really pretty much useless, because
- 19 they are all going to have to use -- go out on
- 20 Cranbury Station Road. Whereas, if that hooked
- 21 into the back of the CBY/the Clarion Partners site,
- 22 they wouldn't even use Cranbury Station Road. It
- would be in and out from there. That would takethe traffic off of Cranbury Station Road, Brick
- 25 Yard Road. So unless you're going to be able to

Page 33

10

- 1 hook that in there, you know, you're pretty much
- 2 defeating the purpose of even putting it there at 3 all
- 4 And the other thing I have a
- 5 question about is with Liberty Way pretty close to
- 6 130, when it gets down that way, and Half Acre
- 7 Road, the way the traffic is, will that -- if they
- 8 made a right turn at those lights and they had to
- 9 put a traffic light up for Liberty Way to get
- 10 across those two roads, that traffic I believe will
- 11 be backed all the way up to 130. I think it is a
- 12 very good possibility that that won't work because
- 13 they won't put traffic lights there because it
- **14** actually will create a stop right on the highway.
- 15 That's the amount of trucks that we have going on
- 16 over there.
- All right. Let me continue to get
- 18 this done.
- Okay. I think the people in
- 20 Cranbury downtown didn't realize the effect that
- 21 that car traffic was going to have on the village.
- 22 Because of the way that backs up on the highway,
- 23 the people will come off on North Main Street and
- 24 come through Cranbury and make a left turn on
- 25 Station Road rather than fight that left turn lane

- 1 Number 1, Brick Yard Road. As related to Brick
- 2 Yard Road, the fifteen feet -- the fifteen foot
- 3 right-of-way donated by CBY/Viridian invades
- 4 wetlands and does not run the entire length of
- 5 Brick Yard Road. The question of taking private
- 6 property arises. Since prior to 2010, Brick Yard
- 7 Road at its max was only supposed to receive about
- 8 twenty-five percent of all the traffic from these
- 9 industrial sites. That was their statement --

MR. PREISS: Uh-hum.

MR. DILLON: -- from CBY and

12 Viridian. It shows that this site was developed

13 with no circulation plan in place. The condemning

14 of private property in order to fix the truck

traffic created is totally unacceptable.

16 If trucks cannot make the proper

17 turn off the Brick Yard Road intersection prior to

18 the approval of the site, why should private

19 landowners give up their land to solve the problem 20 that professional people of Cranbury created? Why

are you going to take my land because it wasn't

22 done right? You know, it's not my fault.

My property also goes down into the

24 ditch on the opposite side of the street.

25 Actually, that road was a dirt path for the horse

Page 34

Page 36

- 1 on 130.
- 2 Just like I go to work quarter to 6
- 3 in the morning and I chose to go down Station Road,
- 4 Cranbury Neck Road. Why? It's a nice relaxing
- 5 drive early in the morning. You're not on 571
- 6 where everybody -- it is a zoo.
- 7 But anyway, I have noticed coming
- 8 from my house coming out to Cranbury Station Road
- 9 and down, there's more and more and more traffic
- 10 coming out of those Amazon and Wayfair and places
- 11 like that going straight across the highway and
- 12 going and using Cranbury Neck Road.
- So we're actually -- it's actually
- 14 hurt the historic side of Cranbury as much -- not
- .5 as much, but quite a bit also. It made a big
- 16 difference in the amount of traffic in town. And I
- 17 can't tell you how to fix that, you know.
- All right. Moving on.
- I think that would slow the truck
- 20 traffic down if you do get that hooked in and that
- 21 goes from Chamberlain & Barclay. You know what I
- 22 mean? Why wouldn't they go down Cranbury Station
- 23 Road --
- A PUBLIC SPEAKER: I doubt that.
- MR. DILLON: All right. Page 46,

- 1 and buggies going to Cranbury Station, to the
- 2 railroad station. That's all that was to begin
- 3 with, and it went through somebody's property.
- There is no monument down on the
- 5 other side of the ditch, and that goes all the way
- 6 to the corner. So the telephone pole on the -- I
- 7 guess it would be the easterly side of that corner,
- 8 that's on my property and they put blacktop all
- 9 around it. They kept moving blacktop closer to the
- .o pole until they finally started hitting the pole.
 - On the right side, my side if you're
- 12 at the stop street, I just had an issue with the 13 water company coming along that had a pin. There
- 14 was a pin right in the blacktop where the corner
- 15 marker is. The water company come along, put
- 16 blacktop on top of the pin, threw more blacktop on
- 17 my grass. Coincidentally, I was home that day and
- 18 I had to call the cops to come out there and they
- 19 said, well, they'll see what they can do. I told
- 20 them, you know, I said, this isn't going to work,
- 21 they have to come back up here and locate that pin
- 22 where the marker is, I paid to have it surveyed,
- 23 you know, and remove the blacktop.
- So there is issues out there that
- 25 just don't go away.

Page 37

All right. But like I said, our

- 2 property does go across the street, because that's
- 3 the way it was.
- I'm trying to go through this
- 5 without any -- my property is no different from the
- 6 Petty Road property. Owners did not want Petty
- 7 Road to be widened or paved because doing so would
- 8 encourage more traffic at their homes which is
- 9 unacceptable for their quality of life. Back quite
- 10 awhile ago they wanted to widen that road, Petty
- 11 Road. The residents said, leave it alone, we don't
- want improvements, we don't want to widen it, we
- don't want to encourage traffic. Okay. I feel the
- same way.
- 15 One of my main questions is: Why
 - didn't our paid professional people do their
- homework instead of condemning private property? 17
 - Also, the third warehouse, and this
- kind of bothers me a little bit, has installed
- signs which say no left turns and direct all trucks 20
- and traffic to now go past my house to Brick Yard
- Road. When you come out the last drive closest to
- 23 my house, they used to be able to make left or
- 24 right turns. Now they put signs up no left turns.
- 25 So when they come out, they got to make a right

- 1 on Station Road. It is basically a dead end
- 2 street, no different than a cul-de-sac. It does
- nothing for traffic control. And as stated on the
- last few paragraphs on this subject, the bridge
- will not have much chance of being built. I don't
- think it's going to.
- This country would probably -- the
- county would probably not allow traffic lights to
- be installed on Station Road or Half Acre Road to
- permit north and southbound traffic flow either.
- That is a problem in itself.
- Page 39 in Number 5 it said, 12
- berm/landscaping in the industrial zone. There is
- no significant berms or landscaping on
- Hightstown-Cranbury Station Road. And it's funny,
- because I brought this up when CBY was there at the
- beginning, they went as far as having a screen in
- this same room showing what it looks like and how
- much vegetation there is, you're not going to even
- be able to see the warehouse. They went down the
- Turnpike and took pictures of the site, you know,
- and said, you won't even see it. Okay?
- Well, then I found out that there
- 24 was no -- Cranbury didn't adopt the Safe Streets.
- 25 Safe Streets is DOT recommended what you should do

1 when you have industrial parks, and it pertains to

acceleration lanes, deceleration lanes and berming.

Cranbury didn't adopt it, which basically means

Hightstown-Cranbury Station Road is a township

right lanes, acceleration, left lane turn lanes,

Page 38

7

Page 40

- 1 turn and go towards Brick Yard Road. So they are
- 2 tainting the traffic patterns of what's on that
- 3 site, and that wasn't on the original site plan.
- You know, Brick Yard Road was never
- 5 supposed to be a major artery onto that site. It
- You know, you were talking about 130
- 9 and how many roads there are. I'm sure just about
- 10 everybody here has been to five points in
- 11 Mercerville. There is five roads that come
- together at one traffic light, and it's like
- dueling traffic lights to see who can move up
- 14 there.
- 15 I can't see putting North Main
- 16 Street, Hightstown and Brick Yard Road together
- when there's truck traffic involved because the
- trucks get out and move so slow to get going. I
- mean that's going to be a nightmare just to signal
- that alone, nevertheless how long it's going to
- take for that light to change. I just don't
- understand how that's going to work, but anyway. 22
- 23 Liberty Way was mentioned numerous
- 24 times as an alternative for traffic is nothing more 25 than an internal route through warehouses ending up

- 6 wasn't supposed to be. It was just supposed to be part of what comes off of 130 that way.
- If you ride -- you should ride down 8 9 Hightstown-Cranbury Station Road and look at the

Cranbury Station Road is a county road,

- berming, the width of the road, the way the road is
- marked and turn around and make a right turn up by
- Chamberlain & Barclay and go down
- Hightstown-Cranbury Station Road and what you see
- is parking lots, parking in front of the
- warehouses, you see the side loading docks, and the
- first where Wayfair is, that has something like 440
- doors on it for trucks. That's what you see.
- Now, I don't know where we were, you 18
- know, as far as I was under the impression you
- weren't going to be able to see this because there
- was going to be berming. Well, obviously that
- didn't happen.
- 23 I've written about Safe Streets.
- Brick Yard Road is without any 24
- 25 safety for the residents that are traveling. And

Page 44

Page 41 1 that road does not have bicycle paths, does not 1 place anyway. Again, let the zoning board do the 2 have any shoulder on the side and is not capable of 2 job. 3 expanding that way. There is a fifteen foot The two industrial, Plant Food and 3 4 right-of-way in front of that -- part of that way 4 Mid-State Filigree, are prior non-conforming. 5 up where that warehouse is. Mid-State is an outdoor manufacturing company But I mean the guy up the street who making slabs for bridges and the like. The company 7 is very sick, John, he came down to visit me and he does all its work outside with six cranes, pouring 8 rode his, what do you call it, wheelchair, the bike beds, concrete trucks and outdoor lighting. 9 thing, down to my place. And I had to follow him Plant Food is a fertilizer facility. 10 home with the four-ways on because I said, you're However, they have just gone -- I believe they went 11 going to get run over on that road with that thing, to the zoning board to install another huge 12 you know. There is no place for anybody to walk or building at their place of business. I have no do anything. There used to be a lot of joggers, problems with Plant Food, none whatsoever. Nicest 14 bike riders and stuff like that, they are not there guy, takes care of his site. He tries to keep anymore. They can't. everything out of view, you know, and he got what Okay. I'm not going to go into 16 he wanted because he is that way, and even though 16 he may be, but he changed his menu from field --17 the --A PUBLIC SPEAKER: You should. Read food for farmers' fields to golf courses because, 18 you know, the farming is gone. But still in all, 19 it. he runs a business professionally and he keeps it 20 MR. DILLON: We already talked about

Page 42

amount of problems he has.

1 land development and maintain the road south of 2 Brick Yard Road industrial light impact. You may

A PUBLIC SPEAKER: No.

MR. DILLON: They had the video and

Now, on Page 43, Number 2, amend

3 not think that it's important, but it is so

4 important, that once you put it in there and once

5 you allow somebody to go there and do that, you

6 can't take it back.

21 this.

22

23 24 stuff.

25

If somebody wants to do outside 8 storage, let them go to the zoning board. Let the 9 zoning board look at it and say, is this going to 10 be environmentally safe, is it out of public sight, you know.

Landscape maintenance is -- that lot 12 13 is well overdeveloped because of the amount of 14 trucks and people. They do a lot of trips back and 15 forth in front of my house. They fill their dump

16 trucks with salt so bad that when they come up to

the corner and make the left, it dumps right at 17

that intersection. It killed the trees on my lawn

when the water runs off.

You know, I mean these are problems 20 21 that landscaping companies create. And I'm just 22 saying that landscape companies, they are high

23 volume with trucks and people. And that's not a

24 business that I would recommend, you know, that you

25 really want to cater to going in and out of this

anything he wants just about in this township

because of the way he runs that business and the

1 with them. He's got parking for a hundred trailers 2 on his site. Why? Because his business allows him

clean. I have no problem with him. And he can get

Rahway Steel Drum, I have no problem

to take a trailer, fill it with whatever products,

the bucket, whatever, like DuPont may want, take it

to their site, unhook it, drop it off there and

pick up an empty trailer and bring it back. So

that's why he needed the trailer parking. But you

can't even see him. They are so far back on the

site. You can't even see those tractor trailers.

And they keep the front of it -- since he went

through his site plan, keeps the front of the place

12 up.

25

So why change that to medium density 13 when everybody is happy and everybody is getting

what they want and they are taking care of the

business? And you got the opportunity in your hand

to govern what goes on out there on an individual

basis. Leave it. If it's not broke, don't fix it.

That's my comment about that anyway.

CHAIRMAN MAVOIDES: Mr. Dillon? 20

MR. DILLON: Yes. 21

CHAIRMAN MAVOIDES: We have a lot of 22

23 people that would like to speak tonight.

MR. DILLON: I just got one more 25 paragraph.

Min-U-Script®

Page 45 1 CHAIRMAN MAVOIDES: Thank you. 1 cemetery we should be included in the buffer zone. MR. DILLON: The zoning had a chance The other twenty-four homes or twenty-three homes 2 3 in Wynnewood are not included. So I've been 3 to oversee, this goes to Plant Food. Allow the 4 board to do their job, that's what I said all arguing for like sixteen years to get us off that. And I went to a meeting at HPC and I already told you it takes five the chairman, Steve Banks, said that we are 6 years in court, to be in court, to get that where recommending that those homes on Wynnewood be it's at right now. eliminated from the buffer zone. 8 And one question I have: Is the And I want to know is the planning 10 rest of the zones going to stay industrial light board -- have they accepted that recommendation and 11 impact? made the necessary change? MR. PREISS: Yes. CHAIRMAN MAVOIDES: Richard? 12 12 MR. DILLON: They are not changing MR. PREISS: Yeah. So the answer is 13 13 we haven't gotten into the specifics of it because **14** to --15 MR. PREISS: No change. we really have to sit down with HPAC and go through MR. DILLON: Nothing else, okay. it on kind of a lot-by-lot basis. 16 That was one of my concerns because MR. ALLAN: It's not HPAC anymore 17 17 in your thing it just says industrial. You know because the A was eliminated. 18 18 what I mean? It doesn't say industrial light. MR. PREISS: Yeah, HPC. It's the 19 MR. PREISS: No. 20 20 old name. MR. DILLON: And there is one other Yes, we met with HPC and we've 21 21 22 issue here. 22 accepted their recommendation generally, but there I was against changing, I don't know is nothing specific on the table. 24 if you did already, the lot size from five acres to So if this master plan goes forward, 24 25 three for warehouses. And the reason is that means 25 the next step would be to get into the specifics of

> Page 46 Page 48

1 that every little parcel of wooded area like where 2 I'm at that has not wetlands and that's three acres 3 could be turned into a warehouse rather than the 4 vista of the woods.

And the other thing that kind of 6 bothers me is you got to have six acres to build a 7 house; five acres for, we call it a farm, and one 8 acre to build a house on. And now we're going to 9 put a warehouse on three acres. It just don't fit.

Okay. I think I said enough for the 10 11 night, and I thank you for your time.

CHAIRMAN MAVOIDES: Thank you for 12 your comments. Appreciate it. 13

MR. DILLON: If you have any 14

questions, let me know.

CHAIRMAN MAVOIDES: Thank you. 16

MR. ALLAN: Richard Allan, 10 17 Wynnewood Drive. 18

I have a question. It was mentioned 19 that HPC made certain recommendations to the

planning board about reducing the buffer zone. 21

I happen to live in one of the -- I 22

23 think it's four or five houses that back up to the 24 cemetery. And for some cockeyed reason they

25 decided that because we were backing up to the

1 amending the buffer. And I think the general sense

2 is that the buffer is too inclusive because it

3 includes properties like yours where the

development doesn't really have an impact on the

historic district.

So the idea is just to focus on those properties that can be seen essentially from

the historic district. So if there is a change to

those properties, it would affect the streetscape of the historic district.

MR. ALLAN: The only reason why those houses bordering the cemetery were included

was because I guess the cemetery and the First

14 Presbyterian Church was historical, but we are

about 700 feet from Main Street, and we are

isolated. I mean until they put sidewalks in,

technically the kids were bused. 17

CHAIRMAN MAVOIDES: So this 18 19 examination commits to reexamination of the buffer

zone with HPC, and I think that's part of what

we're looking at. 21

MR. PREISS: Correct. 22

23 MR. ALLAN: Because when I bought

24 the house fifty years ago, we had no encumbrance.

25 And I've been going to the township meetings for

Page 49

- 1 over forty years and I was there when they even
- 2 created HPAC. And I remember one of the
- 3 concerns -- a lot of the concerns were, well, what
- 4 happens if you tell us something and we don't agree
- 5 with you. And it was made very clear at the time,
- 6 well, it is advisory, it's not mandatory.
- And then a couple years ago the wordadvisory was eliminated, and suddenly my house, now
- 9 if I want to do something, then I require township
- 10 approval, I need HPAC approval, when I think it's
- 11 not under the conditions which I bought the house
- 12 and, therefore, something being forced upon me
- 13 which I disagree with and being irrelevant to being
- 14 historical. The houses in Wynnewood are only
- 15 fifty-three years old.
- 16 CHAIRMAN MAVOIDES: Understand.
- MR. PREISS: We are agreeing with
- **18** you.
- MR. ALLAN: Okay. Thank you.
- 20 CHAIRMAN MAVOIDES: Thank you.
- Please come forward.
- MS. MONDOKER: Hello. I'm Janice
- 23 Mondoker, 92 Halsey Reed Road in Cranbury.
- I want to thank the town for taking
- 25 a look at the master plan at this time.

- 1 neighboring Monroe Township.
 - Second, on Page 43, Number 4,
- 3 rezoning the area south of Brick Yard
- 4 Road/Hightstown-Cranbury Station Road to allow
- 5 medium industrial uses. The current master plan
- 6 includes no definition for medium industry and very
- 7 vague definition of light industry. Where are
- 8 recommendations to improve definitions so we don't
- 9 misallow distribution hubs to be developed? In
- 10 other towns distribution centers are considered
- 11 medium industry because specifications involve
- 12 trucking, not warehousing.

Can you make a comment on the medium

- 14 versus light?
- MR. PREISS: Yeah. So the details
- and the definitions and the changes that would be
- 17 made to the extent that the master plan -- first of
- 18 all, that the master plan includes that
- 19 recommendation; and second, it would be up to the
- 20 township committee as the legislative body to
- 21 direct that the zoning be changed.
- So the details of that would be, in
- 23 fact, made at the time that the zoning was changed.
- Under the Municipal Land Use Law, if
- 25 you make a zoning change that is not consistent

Page 50

Page 52

- Two things. On Page 44, Number 8, 2 retention of current zoning east of the New Jersey
- 3 Turnpike states that a residential development in
- 4 this location would leave it isolated and distant
- 5 from the existing established residential areas
- 6 within the village, distant from Cranbury School
- 7 and from other community facilities and services
- 8 and itself surrounded by warehouse development in
- **9** Cranbury.
- 10 Cranbury already has residents and
- 11 homes here and the police department is right
- 12 there. The words isolated and distant seem
- 13 partially subjective for an area one mile from the
- 14 village.
- 15 If the board is concerned about spot
- 16 zoning, changing the zone for the Halsey Reed Road
- 17 parcel is quite the opposite of spot zoning.
- 18 Changing the zoning is to bring the entire area
- 19 into conformity with the low-density residential
- 20 and agricultural uses existing in the area and the
- 21 adjoining residential and agricultural uses in
- 22 Monroe Township. Doing so would recognize and
- 23 respect the rural land use patterns in both
- 24 municipalities. In essence, the zone change would
- 25 be compatible with the land uses of Cranbury and

- 1 with the master plan, then it creates a longer
- 2 procedure and it makes it much more difficult to
- 3 adopt it.
- So I think we were -- the planning
- 5 board and the subcommittee was very careful in this
- 6 situation not to get very specific about a lot of
- 7 these recommendations because, for example, if we
- 8 put in the master plan, here is a definition of
- 9 medium industrial, and then at the time that the
- 10 zoning was adopted there was a decision to make a
- 11 change to that, it's possible that that change
- 12 would be inconsistent with that in the master plan.
- So we focussed on the policy and the
- 14 details will be -- if that recommendation is
- 15 followed through, will be handled when the zoning
- 16 gets changed. And the way the zoning gets changed
- 17 is there would be a draft, it would be shown to the
- 18 planning board, it would be discussed in public,
- 19 residents would have an opportunity to review it
- 20 and then there would be a public hearing on it. So
- 21 it's not something that would be undertaken
- 22 lightly.
- 23 CHAIRMAN MAVOIDES: Thank you.
- MS. MONDOKER: Thank you.
- MR. PREISS: Thank you very much.

Page 53

MR. MARLOWE: Don't be alarmed, I'm 2 not going to read this.

I'm Frank Marlowe, M-A-R-L-O-W-E. I

4 live at 11 North Main Street, Cranbury.

I'd like to talk to this committee

- 6 about the treatment of the sidewalks in the
- 7 reexamination report from the master plan. I think
- 8 some of you know that I've been concerned about the
- 9 condition of sidewalks in the village and also in
- 10 the township. I was interested in how it was dealt
- with here in the master plan and its proposed
- 12 reexamination report.
- It turns out the pedestrian access 13
- 14 is given quite a bit of emphasis in the master plan
- 15 and also in this report. In at least a half a
- dozen places the importance to the community of
- pedestrian access is stressed, or at least
- 18 mentioned.
- The walking village, the hard edge 19
- 20 of the village where people can walk from their
- 21 housing into town, et cetera, are all given praise
- 22 and encouragement in this document, as well as in
- the master plan.
- In contrast to that, the sidewalks 24
- 25 that we have throughout the village are in a

- 1 want to go over details about how to fix the
- 2 sidewalks and what to do in front of this
- 3 committee. But I think the master plan is a
- 4 starting point for how things get put into the land
- use law. Maybe not everything in the master plan
- gets enacted or acted upon, but I'd like to see
- something in this recommendation that points to or
- recognizes the value of changing the way we treat
- our sidewalks. We leave it up to chance now.
- So it's the responsibility of the 10
- 11 homeowner next to the sidewalk, I think as all of
- you know. There's quite a bit of variability in
- the attention and care that homeowners give their
- sidewalk and there are always some that are in
- disrepair. I know the town can force a homeowner
- to fix it. But if it happens at all, it's only
- when the situation is so dire that there's
- practically no choice.
- Well, okay. Is there any follow-up 19
- 20 that will come from this or does it just end right
- here? 21
- CHAIRMAN MAVOIDES: No. Listen --22
- MR. MARLOWE: What happens next? 23
- CHAIRMAN MAVOIDES: We're going to 24
- 25 take this commentary and we're going to evaluate

Page 54

Page 56

- 1 continual state of disrepair due to the destruction
- 2 by tree roots. I would say this type of thing is
- 3 easy to prevent, although we haven't taken the
- 4 steps to prevent it.
- I was concerned that in this
- 6 reexamination report recommendations are made for
- 7 many things but there's no recommendation
- 8 whatsoever about actually doing anything to change
- 9 the steady state condition that we have of our
- 10 sidewalks, that they are falling -- they're not
- 11 falling apart. They are being pushed apart by the
- 12 tree roots. I would think this would deserve more
- importance than it's given. 13
- The sidewalks are the largest public 14
- 15 infrastructure in the town, bigger than the parks,
- 16 bigger than the school play yards, bigger than
- 17 anything else in town as far as area goes, and they
- 18 must be among the most highly used set of
- 19 infrastructure we have. People use these
- 20 sidewalks, all ages and for purposes starting from
- 21 sunup to well past sundown every single day,
- 22 walkers, runners, baby carriages, school children,
- 23 et cetera. So it would seem to me to be important.
- And I'd just like to say I would
- 25 like to see something in the master plan. I don't

- 1 the document that the subcommittee is recommending
- to the planning board to be adopted. So this is
- helpful. We appreciate it.
- MR. MARLOWE: Okay. Well, good
- luck. Thank you.
- BOARD MEMBER KAISER: I have a
- question for Richard.
- How could this work, the suggestion 8
- 9 that --
- MR. PREISS: Yeah. I see no reason 10
- why it can't be added to the master plan. It's not
- a recommendation that has a land use.
- CHAIRMAN MAVOIDES: Richard. 13
- 14 timeout.
- How about the subcommittee take up 15
- these issues individually and make a recommendation
- to the planning board.
- MR. PREISS: Sure. 18
- CHAIRMAN MAVOIDES: Just in 19
- fairness, because we're not addressing every issue here publicly. 21
- 22
- MR. PREISS: That's fine.
- 23 CHAIRMAN MAVOIDES: Are you all
- 24 right with that, Mike?
- BOARD MEMBER KAISER: Yeah. Mr. 25

Page 57 Page 59 1 Marlowe didn't ask Richard the question, he asked 1 it. I apologize. 2 us, and I'm trying to point it over there. That's Page 27, it states, generally residents at the community meeting in April, 2019 3 all. 4 I'm fine with it. did not express serious concerns regarding MR. PREISS: I'll just say one protection of the natural environment in Cranbury 6 thing. It's part of the capital improvement based upon current practice and developments. 7 program that the township is supposed to undertake. I think there was quite a few 8 So it's really not a master plan policy, but that comments about the warehouses and trucks and noise 9 is something that, you know, we can add to the pollution, you know. So I think that comment is a 10 master plan to give it some impetus. little bit -- a little rosy. You know, I'm not 11 MR. MARLOWE: Well, I don't think it sure whether you changed the wording or how that even needs to be specified how it's handled. Just happened. I just want to just point that out that, 12 the importance of the subject, itself, I think yes, there was quite a bit of comment on how would be a good starting point and departure from warehouses have impacted. what we've had up to now. MR. PREISS: Yeah. I think what 15 MR. PREISS: And I think the best 16 that comment intended to convey is that there way for you to get any action of that would be to wasn't a comment that the current protections in actually go to a township committee meeting and place were not being implemented by the planning board in individual site plan applications. talk about it where the engineer is there. MR. MARLOWE: I've been. We understand that there are 20 20 MR. PREISS: Okay. impacts, as there would be in any development, with 21 21 MR. MARLOWE: Well, all right. I regard to noise or truck traffic. But that is not 22 guess I follow your point. Thank you. a specific environmental impact relating to a 23 MR. PREISS: Thank you very much. variance or a waiver that was granted to a

Page 58

Page 60

MS. ROGERS: Hi, Barbara Rogers. 1 Thank you so much for taking many of 2 3 the suggestions from the environmental commission. Chapter 13 is, you know, an 5 important part of the sustainability effort that 6 Cranbury is part of. And it's really great to see that you trust the environmental commission to make 8 recommendations on sustainability. I just -- you know, I was looking 10 at -- just curious about people that have put input 11 into -- you have a planning board, the Cranbury Township Committee. You don't have like the environmental commission made comments and that the historic preservation. I don't know if that needs to be put in, but I've seen in other reexams how other people have been -- their comments have been. 16 MR. PREISS: Yeah. So I don't know 17 18 if you were here earlier in the meeting. I 19 specifically mentioned that we had meetings and that there was input, and I would certainly acknowledge those contributions in the introductory section. So that can be done. 22 23 MS. ROGERS: Okay. And Page 27, I 24 have an electronic version, so I need to get there. 25 I apologize. It states -- oh, boy, let me get to

CHAIRMAN MAVOIDES: Thanks.

assiduously enforced by the planning board and I think people at that meeting recognized that. We are not to say that everything is perfect and every development doesn't have impacts. So I think that's what that comment was intended to 7 convey. MS. ROGERS: Thank you for your 8 interpretation. Okay. I understand that now. On Page 23, it was disappointing to 10 see that the wording -- the way it was worded is that, you know, bike path is not feasible on Plainsboro -- I think it's Plainsboro Road. I think I have attended subcommittee meetings on traffic and we're going to be working with applying for a technical assistance grant to try and identify a bike audit for -- bike and walk audit, and we're going to be looking at areas that potentially could be a bike or walk area, and that would be prior to a bike and walk plan. So, you know, by, you know, already 21 22 having it like negative in the master plan, you know, it would make it harder if per chance this

audit did turn up that maybe this could happen.

MR. PREISS: Yeah. I am not

developer, you know, for not meeting stormwater

1 regulations or noise regulations. Those are

24 25

Page 61 1 disputing that. I think -- and we encourage the 2 environmental commission to do that and to come 3 forward with any program or recommendations they 4 could make, but there have been questions over the 5 years. Residents and others at certain meetings 6 have talked about that and I think the current view 7 is that, just generally, with most of the rural 8 roads is that they are very long and very narrow 9 and widening them would just encourage speedier -faster traffic and that that wouldn't make it necessarily safe for pedestrians or people who 12 bike. And so unless there is a consensus 13 14 about exactly how those would be improved, I don't think we can recommend that bike lanes be added to those roads at this time. 16 MS. ROGERS: If an audit from 17 Voorhees Transportation Center said, oh, this is a 18 possibility --19 MR. PREISS: Yeah. Look --20 MS. ROGERS: Okay. So I'm just 21 worrying because, you know, it is a negative connotation than trying to come up with something. MR. PREISS: Right. 24 25 MS. ROGERS: It just seems --

1 MS. ROGERS: Towards Petty Road. MR. PREISS: That goes all the way 2 over to Petty Road. 3 4 MS. ROGERS: Another question that I have is, you know, it's difficult to see like everyone. I think one of the most important things that I've heard and maybe it was at that meeting is the importance of greenways, walking greenways. And then here it is again, the stream corridors in this part of Cranbury is very unlikely, you know, to have a greenway network, and here it is again. People want bike paths, people want 12 walkways and in this master plan it just seems, you 13 know, stomping on it. That's the wrong word. MR. PREISS: Yeah. So I think what 15 happened is in the 2010 master plan we did encourage it. We did have language about that. MS. ROGERS: Yes, it was much more 18 encouraging, exactly. 19 MR. PREISS: And basically what we 20 found out is that we sort of went up against the hard reality of the fact that most of the property that is adjacent to the stream corridor where it would -- where easements would have to be provided 25 is owned by a farmer who is a hundred percent dead

Page 64

Page 62 MR. PREISS: Right. So, you know, just let me just sort of step back. A master plan is a living document. 3 MS. ROGERS: Okay. 4 MR. PREISS: So policies change. I 6 mean if the environmental commission came forward 7 and they did a study and you said, here was your 8 policy and this is why it needs to be changed and 9 can be changed and it's feasible to do so and here 10 is the way in which we're going to do it and not 11 incur a lot of cost to make it safer, we're still going to maintain its scenic value, I don't see why, you know, the township committee or the 14 planning board would not change that policy. But for the time being I think the 15 16 idea is we are not going to make those improvements because currently if you tried to add bike lanes to the road, I think you're just encouraging, you know, accidents to happen because it's not safe. MS. ROGERS: Okay. Yeah. So is 20 21 that comment for the entire Plainsboro or just that 22 section? I'm just curious. 23 MR. PREISS: I think when we're

24 talking about Plainsboro Road, it's the section

25 once you leave town that goes --

1 against providing that accessway. So for the time being, it's probably, you know, rather than -- I think it's just a dose of -- you know, it's just a realistic statement. It doesn't mean that we've abandoned that hope and perhaps there is a subsequent farmer or the farmer will change his mind. So we think it is something that would be great but we just want it to reflect the fact that, you know, we have run up against this issue. So we are not discouraging Cranbury from seeking it and if the farmer changes his mind, you know, I think no one would be happier than the planning board and the township committee. MS. ROGERS: I guess just having the 15 vision, you know, as you said, a little more encouraging, you know, would make it probably more likely people might try to pursue it. That's kind of what I'm just --MR. PREISS: I mean I hope that that 20 would continue to happen, so yes. 21 MS. ROGERS: And I think it was -- I think -- so as Frank said, if we have other

24 comments, can they be written? Like how does that

25 work? Like if we had a particular -- you know, I

Page 65

- 1 don't want to go into a lot of details I have. But
- 2 is there a way, is there a mechanism to still
- 3 comment, because this is still being discussed;
- 4 correct?
 - MR. PREISS: Yeah. So if let's
- 6 say -- you know, the hope is actually at the next
- 7 planning board meeting, which is November 7th, we'd
- 8 like to have the hearing on adoption. So I would
- 9 say my recommendation would be to allow residents
- 10 to comment let's say through the end of the day on
- 11 Monday through written comments. Send your
- 12 comments to Josette and then that's something that
- 13 the subcommittee and the planning board can
- 14 consider.
- MS. ROGERS: Okay.
- MR. PREISS: If it's something that
- 17 hasn't been brought up at this meeting.
- MS. ROGERS: So written comments to
- 19 Josette by -- what's that date?
- MR. PREISS: Monday is the 21st, end
- 21 of the day Monday.
- MS. KRATZ: Preferably via email so
- 23 it's --
- MR. PREISS: Yes.
- MS. ROGERS: And thank you.

- 1 understand the difficulties and the idea of getting
- 2 Plainsboro Road -- getting a bike lane on
- 3 Plainsboro Road, but I think that, you know,
- 4 because one farmer puts up a roadblock, I still
- 5 think we should maintain the language of
- 6 encouraging bike lanes and bike safety.
- 7 I think that, you know, we all want
- property values in town to go up. And the thing
- 9 that I hear most from residents who are moving to
- 10 town is they want walkability, they want
- 11 accessibility. They like the idea of being able to
- 12 possibly bike into Princeton. Once you get into
- 13 Princeton or even into Plainsboro, as far as bike
- 14 lanes, you have access to a very large network of
- 15 bike lanes. You know, the Lawrence-Hopewell bike
- 16 system, you know, it's very extensive. And I feel
- 17 like we're sort of an island, that we are kind of
- 18 orphaned just by the fact that we can't access the
- 19 Plainsboro bike lane.
- So I would encourage you guys to
- 21 reconsider and to put in more sort of hopeful
- 22 language about installing bike lanes. Obviously
- 23 Plainsboro Road would be a heavy lift, maybe there
- 24 is other alternatives that we just haven't
- 25 considered yet.

Page 66

Page 68

- MR. PREISS: Thank you, and thank the environmental commission for their input, and
- 3 the same goes to the historic preservation
- 4 commission.
- 5 MS. ROGERS: Well, I know that we
- 6 appreciate that, you know, we are able to
- 7 communicate and you're able to listen.
- 8 MR. PREISS: Thank you very much,
- 9 Barbara.
- MR. SCOTT: Good evening. Matthew
- 11 Scott, 82 North Main.
- I just want to thank you guys for
- 13 being here at 8:30 on a rainy Wednesday night. I
- 14 just have a few comments.
- I too have gone over the 2010 master
- 16 plan, and I was encouraged by some of the more
- 17 progressive ideas of changing the parking layout in
- 18 town and encouraging bike lanes and more pedestrian
- 19 access and more pedestrian friendly policies.
- 20 On the township committee I've
- 21 worked on the traffic subcommittee and we've worked
- 22 on pedestrian safety. We put in, you know, link
- 23 crosswalks and I encourage the master plan to be
- 24 more -- the language to be a little more
- 25 encouraging about bikes and pedestrian. I

- 1 Another issue I was thinking about
- 2 was the issue with Cranbury Station and with Halsey
- 3 Reed. I met with Keep Middlesex Moving a few weeks
- 4 ago and I was discussing some of these issues with
- 5 them and they mentioned to me an idea years ago
- 6 about the possibility of an expanded parking area
- 7 behind the rest stop on the Turnpike and that it
- 8 could possibly have access to the warehouse
- 9 district behind it.
- I don't know the exact layout of
- 11 that and it was something that I told them that I
- 12 would bring up to you guys, you know, and that if
- 13 it's something that could be looked into, a place
- 14 for trucks where they can park so they wouldn't
- 15 necessarily have to park in Cranbury Station. I
- 16 think that is something that is worth looking into.
 - And I think that's all I had. I
- 8 just want to thank you again for your work and I
- 19 hope a lot of these things will come to fruition.
- 20 Thank you.
- MR. PREISS: Thank you very much.
- BOARD MEMBER MULLIGAN: I need to
- 23 make a couple comments.
- So, you know, when we look at
- 25 Plainsboro Road, right, you know, we have to look

Page 69 Page 71 1 Route 130. 1 back at Cranbury is an island. It is unique. 2 Right? And you look at Plainsboro, what's If everyone is so hot, why don't we 3 different when you get to Plainsboro Road? Massive 3 talk to the homeowners? See if they'll give us a 4 residential development. We don't have massive 4 right-of-way. Why is it always the farmer? There 5 is another side of that creek as well -- or the 5 residential development on Plainsboro Road. And when you look at it, it's a brook as well, we can ask them. 7 unique charm factor of Cranbury, where you have the So, you know, the reality is it's 8 crops coming right up to the road and you don't dangerous to be on that property with those large 9 have all this cutback landscaping and concrete and tractors and all the equipment that they have out 10 cement and everything. You have this farm charm. there. It is not safe. I've been back there. And 11 You have this, you know, country road feel, and the last thing they want to do is come whipping 12 that's one of the tenets that goes back to the around on a tractor and like run over somebody. master plan for probably thirty years when Betty You know, that's really what it comes down to. Wagner was very involved, where we want these I think they are okay, they would greenways and the farms and everything as you come 15 love to let people do it, but there is a safety into town to make it intimate and make it 16 factor. That is the reality here. different. BOARD MEMBER KAISER: I'd actually 17 So it's something I think really the 18 like to point out, one of the biggest reasons why 19 committee going forward and the board has to think Paterson doesn't want that is they have to protect about. Do we want to look like every other town or their crops from deer. do we want to look like Cranbury? There may be BOARD MEMBER MULLIGAN: Absolutely, 21 better areas to worry about the bike routes than 22 that too. 23 there. 23 BOARD MEMBER KAISER: And they have MR. SCOTT: Yeah, I agree. I agree. to do that by hunting. 24 25 I mean Old Trenton Road is wide BOARD MEMBER MULLIGAN: Yeah. 25 Page 70 Page 72 1 enough, you could put a more protected bike lane BOARD MEMBER KAISER: If there is a public right-of-way barrier, we are impeding their 2 there. BOARD MEMBER MULLIGAN: That is a ability to farm the property. 3 BOARD MEMBER MULLIGAN: Spot on 4 great spot. there too. MR. SCOTT: Right? 5 BOARD MEMBER MULLIGAN: Exactly. BOARD MEMBER KAISER: So that's the 6 MR. SCOTT: I just think that we main reason why he doesn't want people back there. 7 BOARD MEMBER MULLIGAN: And the should be more optimistic in our language and think about, you know, the possibilities. equipment. BOARD MEMBER MULLIGAN: And I don't BOARD MEMBER KAISER: Yeah. I mean 10 11 disagree. But I think we just need to rechannel 11 there is a number of reasons. And to push him to 12 our energy maybe into other areas. 12 give up his ability to farm, I think that 13 MR. SCOTT: Yeah. sacrifices the quality of that rural area that we BOARD MEMBER MULLIGAN: Plainsboro want to preserve. 14 15 Road is not the panacea. Right? BOARD MEMBER MULLIGAN: Yeah. 15 MR. SCOTT: Yeah. MR. SCOTT: These are all really 16 16 BOARD MEMBER MULLIGAN: So the other valid points. 17 17 comment I would make is, you know, everybody wants My point, again, to this greenway down the Paterson property and along 19 Lawrence-Hopewell, there is a lot of bike paths 20 the brook. Right? that are abutting farmland and, you know, they There is a right to farm, and figured it out somehow. 21 22 realize, farmers gave up the rights to their land, I think at the end of the day, all

23 their development rights, a lot of money they gave

24 up, in order to keep it preserved farm so we have

25 this great preserved character on this side of

23 of these things, even though you might, you know,

25 increase the attractiveness of the town which will

24 upset a few farmers, all of these things will

Page 76

Page 73 1 increase property values and make all of us 2 happier. So I think these are all things that you

BOARD MEMBER MULLIGAN: I just think 5 that there's other areas. That's all I'm saying.

So I agree with you.

3 should think about.

MR. SCOTT: Yeah.

BOARD MEMBER MULLIGAN: Again, why 8

9 not, if everybody's so hot on it, have a

10 conversation, maybe the property owners will give 11 you an easement along their property, maybe not but

12 you can try it. It is a thought.

MR. SCOTT: Whatever you can think 13 **14** of.

15 CHAIRMAN MAVOIDES: Thank you.

MR. SCOTT: Thank you, guys. 16 CHAIRMAN MAVOIDES: Please. 17

MR. MOROLDA: Nick Morolda, 93 18

Halsey Reed Road, Monroe Township. 19

I want to thank the board and the 20

planner for at least listening to us back a few

months ago about our concerns about Halsey Reed 22

23 Road.

One of the things that really 24

25 frightened me is one of the things Bob said, and

So I think that that is something

2 that should be brought up because nobody is asking

3 that that be developed for high-density

4 residential. They're asking that it be considered

to be rezoned for low-density residential and

preservation. That would be consistent with what

has gone on in that area.

There are circulation issues in that

area which not only impact Cranbury

Station-Hightstown Road but could impact Halsey

Reed Road.

So I'd ask for a holistic approach 12 13 if and when an application ever comes before the

board. 14

15 Thank you.

CHAIRMAN MAVOIDES: Thank you. 16

MR. GOLISANO: Hello. I am Steve 17

Golisano. I've been a long-time Cranbury resident

since I've been very young. I currently have an

architecture office on Main Street.

I am a member of the historic 21

preservation commission, and I thank the board for

meeting with me and David Szabo earlier this year I

24 believe to discuss the recommended changes, and it

25 seems that a lot of them have been brought through

Page 74

1 to this and we thank you for that.

One, just a small point on Page 28.

We had a point to -- I believe it says that an

4 updated inventory of historic sites was completed

by HPAC in March of 2016. I think we would rather

say that September of 2017 and September of 2018.

Those are the two documents that are now actually

printed and will be available in the library, in

the reference section of the library, for looking

through, for any resident to reference.

The other point would be just a

12 quick question for the committee or for the board

about follow-up for some of the specifics on the

consideration of designation of individual

properties outside the districts and in terms of

farmland or farmhouses. 16

You know, we know that there is a 17

process that has to go on. We're working with Mr.

Preiss here about the -- you know, you can't just

do that to someone's house, as they own it. We

don't anticipate being a burden on anyone. You

know, no one wants to be a burden on any homeowner.

23 It's something that we feel would be

24 something that the homeowners would enter into

25 willingly in order to help preserve resale value of

1 that is I didn't know that a warehouse can now be 2 developed on three acres of ground. And that's

3 pretty frightening considering I live on Halsey

4 Reed Road. I'm hoping that if such an application

5 comes before the board that you will look at it

6 holistically.

Halsey Reed Road is surrounded by 8 wetlands and residential areas. And I think like

9 Janice was saying, I guess when the discussion was 10 going on about medium impacts south of Brick Yard

11 Road and that that could be rezoned because of the

12 activities currently going on there. You know, I

13 was listening to it and it seemed like there wasn't 14 much I'd say consideration given to the negatives

15 of putting medium impact there. One of them being

that, exactly what Bob was talking about, you open

that up without having a review by the board, the 17

zoning board, planning board. It's scary. 18

But as far as Halsey Reed Road goes, 19 20 the current activity there is road density,

21 residential and preservation. There is a mitigated 22 wetland bank on one end and wetlands on the other

23 end. You know, I've heard rumors that they can

24 develop 10,000 units on that property. There is no 25 sewer and water on that property.

Page 77 1 their homes and increase resale values of their 1 MR. PREISS: That's great. MR. GOLISANO: I just put that out 2 homes. That is something that just -- one there for people to see if they can attend to see 3 4 thing is we provided somewhere close to thirty plus some of the unique history of some ex-presidents and the first, you know, railway crash in the 5 properties that become -- we are recommending. 6 It's kind of an ongoing list that was adapted from country in 1833 and, you know, it's on that train 7 a list in the eighties and then a list in the and some interesting things like that. 8 nineties. It's been an adapting list and we've And some of these smaller buildings 9 even included portions of those houses, some of in this area also too, they have some significance 10 them are on the list but have been labeled as, you in some of them. One of them in particular on 11 know, demolished just to show that it's happening Applegarth Road, you know, just recently even where, you know, buildings are coming down and they disappeared just randomly. So it's one of those things where, you know, it's -- we appreciate the are mainly all from the early, mid, late 1800s. board's, you know, consideration on keeping the So just a quick question on the 14 follow-ups and whether or not there will be some importance on that. 15 15 sort of appendix listing houses or giving, you CHAIRMAN MAVOIDES: Thank you. 16 know, ability for that, or how that would work? MR. GOLISANO: Thank you. 17 17 MR. PREISS: We are not going to add MR. PREISS: Thank you very much. 18 18 19 anything here. Again, I think you heard my other And please convey our thanks to HPC for their 19 comment is the danger of putting the list is, you recommendations. 20 know, let's say the list gets updated and it's not MR. GOLISANO: Thank you. 21 in the master plan. Then you say, well, the list MR. PREISS: Thank you. 22 is not on the master plan so it can't be. MS. MOROLDA: My name is Kathie MR. GOLISANO: I see. 24 Morolda. I live on Halsey Reed Road for 24 25 MR. PREISS: So we'd rather keep the 25 forty-two years on the Monroe side.

Page 78

Page 80

1 policy sort of fairly general and open so that when 2 those -- when the actual list is -- the actual 3 designation takes place there's no issue with 4 regard to inconsistency. And I won't get into it now, but 6 there are different options in terms of designating 7 individual properties depending on the community 8 where it's only done, for example, if the homeowner 9 agrees to it. Once the homeowner agrees to it, 10 then it's forever. Historic district, you don't have a 11 12 choice, you are in. But individual properties, there is a methodology where you only designate 14 those properties where the homeowner grants their 15 consent. MR. GOLISANO: Okay. 16 MR. PREISS: So we could certainly 17 look into that. 18 MR. GOLISANO: Okay. And just 19 another follow-up on the discussion about Cranbury Station as far as a historic significance of it. 21

There is going to be a talk at the

23 library soon from John Kilbride actually who is

24 going to give an extensive talk on the history of

25 Cranbury Station and the passenger railway.

And I would like to thank -- I was going to mention about the presentation at the library next week also. But I really want to thank all of you for reexamining the master plan, and especially consideration of the historic value of the Cranbury 7 Station. I also would like to say thanks to 9 the police department because, as many of you know, presently the Cranbury Station is being used as a 11 truck stop and I appreciate Matt Scott's looking into that also because, in fact, tonight when we left there was another truck settling in for the 14 evening. They do use it as a truck stop and wait until the morning comes to get their deliveries in. But I have to say the police 16 department has been wonderful recently. We've 17 spoke with them several times and every time we call, they do come out and ask the person to move on because it's private property. So, again, I'd like to thank you for 21 tonight and hopefully that you will consider the 22 23 historical value of that property. And everyone go to the presentation 25 at the library.

Page 81 Page 83 CHAIRMAN MAVOIDES: Thank you. 1 that's no small number you are talking about. 1 MS. MOROLDA: Thank you. MS. SPANN: Right. 2 2 MR. DILLON: I just have two short MR. FERANDA: But there are --3 3 4 comments, no papers. 4 MS. SPANN: And our engineers are MR. PREISS: Can we let everybody not involved, involved, this is more of a state else talk before you get a second -figuring out? MR. DILLON: I didn't know there was 7 MR. PREISS: It's DEP with the somebody else. permitting and it's DOT in terms of the financing. 8 CHAIRMAN MAVOIDES: Two more, Bob. MS. SPANN: Okay. Okay. So that 9 MS. KRATZ: Three more. was -- I just really wanted to understand and 10 MR. DILLON: I'm sorry. I didn't appreciate the fact that the plan was a good plan. 11 see. They are my friends from --And that roadblock is a lot of what's causing 12 MS. SPANN: Evelyn Spann, Liedtke issues for us. And a lot of the things that I'm 13 Drive. Hi, Richard. A couple of things. reading in here --Mr. Chairman, thank you for 15 MR. PREISS: Right. 15 listening. Thank you for giving us this MS. SPANN: -- are trying to 16 opportunity. compensate for that roadblock. Okay, one. 17 17 I heard you say at the beginning The second thing is, I really do 18 about the master plan and this master plan coming want to make sure that we appreciate and respect in from 2010. We heard in April -- we all got our farmers. I did hear a comment, well, if we 21 together, I got to sit with this group, and we make a few farmers upset. I don't appreciate that. 22 heard all of the feedback. And the overall If we don't have preserved farmland, feedback, as Richard said, was very good and very we change the dynamics of our town. And it's positive and a lot got done. 24 something that I know that you respect and that 25 So the hours that you spend, the 25 you, you know, put forward.

Page 82

Page 84

1 work that you do and the training that you have on 2 behalf of our community is really above and beyond, 3 and I can't thank you enough for that. My question is more to clarify, just 5 because I want to make sure that I understand. And Andrew, this will be a question for you. When we talk about Liberty Way and 9 million wand, in your opinion, how much would that alleviate a lot of the issues and concerns that we 11 are talking about? Again, with a \$20 million magic

8 we talk about the bridge. If we had a magic \$20 12 wand. MR. FERANDA: It probably would be 13 14 significant, because that traffic would no longer travel north/south on 130, would not use those intersections. Commercial traffic I'm talking about. You'd still have your commuter traffic. 17 But if it were fully connected down to Old Trenton, then the commuters would also -- the regional traffic would also come off of 130. It adds capacity in the north/south direction. 21 It's not just money. It's 22 23 environmental considerations and it's permitting. 24 There are other issues that can be significant 25 issues. So having the money is one thing, and

So I just want to make sure that for the record we understand and appreciate and respect our farmers. If they can't have a walkway on their fields for whatever reason, their farming is their livelihood and we need to respect that. MR. PREISS: Thank you. 6 7 Let me just say one thing about the Liberty Way bridge and the four-way intersection at Old Trenton Road. That was something which I think was great foresight. Mel Lehr was a resident of the 12 community and I think he was on the planning board. 13 He was a transportation engineer. And I think in

it was basically his idea to have this bypass road so that traffic that was coming northwards on Route 130 and then all of the traffic that was going to be generated within the east side of Route 130 would use the bypass road to get to Exit 20 8A. So that was the vision. And so that vision remained. In 21 22 2010 we were under discussion with the DOT. That was still a fairly good possibility that would 24 happen. As years have gone on, we've seen that

14 the early -- late eighties, early nineties I think

25 it's -- you know, it has these difficulties.

Page 85 So I think we've kept it in the 2 master plan because, you know, we always have the 3 hope that it would happen. But I think what we try 4 to convey in the master plan is that we have to 5 take a realistic look at how traffic moves in that 6 area and if that's not going to happen, how are we going to deal with it. And I think one of the things that 9 we've recognized is that part of the plan would be 10 to -- now that Exit 8 has been significantly 11 improved since the 2010 master plan, with the 12 widening of Cranbury Road and the fixing of that 13 circle, that there would be a possibility that some of that traffic instead of using Liberty Way to go north would come down that way to go to Exit 8. So that's one of the ways --16 MS. SPANN: Come down which way? 17 Come down 130 or come through --18 BOARD MEMBER JOHNSON: Brick Yard. 19 MR. PREISS: Coming through Brick 20 Yard Road. 21 MS. SPANN: Okay. That's what I 22 thought you meant. 23

MR. PREISS: But it would mean that 2 instead of -- you know, right now what happens is there's not enough maneuverability for the trucks to enter the circle and make a left hand turn either from 130 or coming back. It's dangerous. So, you know, I'm not an engineer 6 and this is kind of a combination of civil engineering and traffic engineering, but the idea would be to have smoother flow of traffic and basically to allow traffic to come in and out much more safely and to allow the circulation to be a 12 lot better. MS. SPANN: Okay. 13 BOARD MEMBER MULLIGAN: This is way 14 15 more than a Cranbury problem. Let's just acknowledge this. Okay. This is a regional traffic problem. Okay. Cranbury is not going to solve this by ourselves. You can look at this, the circle has 19 got to be done. Right? Just south of the circle there is a bridge that goes over the Millstone River, that's going to be redone. That's also on the roadmap for the state. So I've seen the same 24 concept drawings. They're looking at taking the 25 circle out, redoing that bridge. Right, boom, you

Page 86

Page 88

MR. PREISS: Come through Brick Yard 2 and then proceed to Exit 8 rather than trying to 3 force its way, you know, back onto 130 to go to 4 Exit 8A. So I think that's -- because if you force 5 everything north, that's where you have all of the 6 problems. So, you know, it's just we've run up 8 against the hard reality of not being able to --9 the likelihood that we may not be able to have the 10 bypass road. And so with all the traffic that we 11 have, you know, the alternative that we've kind of 12 looking into now is kind of sending it southward, 13 so. MS. SPANN: And what would you 14

MR. PREISS: Yes.

MS. SPANN: Okay.

24

25

15 think, and this might be a question for you, Andrew, but what would you think on the circle, on the traffic circle, would that be -- is the plan there for stoplights to better regulate that? Would that be a stoplight or would that be the 20 elimination of the circle? MR. PREISS: I've seen one of the 21 22 concept plans and it would be like either a four or 23 five-way intersection that would be traffic 24 controlled.

MS. SPANN: Okay.

1 do that.

Now, maybe somehow some day Liberty 3 Way gets done. You're going to need funding from 4 the state or federal government just the reality of how big that project. Okay. So now you get that 6 going. But then, what about Exit 8A? That

is a mess. That's got to be completely redone. 9 Okay. 8A has got to be ripped out and redone. Plus, additionally, they have to look at moving traffic onto Exit 8, hopefully out maybe onto the bypass. 12

So this is a massive regional 13 14 project that we need our elected officials at the state level to support us on. That's just the reality of this. So Linda Greenstein, Dan Benson, Wayne DeAngelo need to step up now and they need to start helping us. 18 Additionally, just a little more 19 history for you, we aggressively looked during the

Wayfair project as a township committee when Susan Goetz was there, Dave Cook, Jay Taylor, Gwen and myself, at trying to at least get the portion done for Old Trenton Road. We were looking at so many

25 millions to try and get that done. It was just

2019 Master Plan Reexamination October 16, 2019 Page 89 Page 91 1 unfeasible. We were pushing 10 million between 1 MR. SCARPULLA: Thank you. 2 acquisition and permits and trying to build a CHAIRMAN MAVOIDES: Thank you. 2 3 bridge so the wood turtles could get under it. It 3 MR. DILLON: Okay. Two comments. 4 was crazy. And that was not even building the main 4 Bob Dillon, 32 Hightstown-Cranbury --5 bridge, and we are hearing like \$20 million for the A PUBLIC SPEAKER: At the mike so we 5 6 main bridge. can hear you. So regional problem. We need state 7 MR. DILLON: First thing, Cranbury 8 and federal to come in and help us with it. That's does -- Brick Yard Road does have nice vistas. It just the reality. One man's opinion. There you has the Stults Farm which is farmland preserved. It has Kurag's (phonetic) farm which is farmland 10 11 CHAIRMAN MAVOIDES: Thanks, Dan. preserved. BOARD MEMBER MULLIGAN: You're BOARD MEMBER MULLIGAN: Sure. 12 12 welcome. MR. DILLON: And both of those farms 13 13 MR. PREISS: Thank you. go all the way up to the road. Okay. 14 Now, the other thing you have there CHAIRMAN MAVOIDES: Any other 15 15 16 is on my side of the road there is a lot of comments, questions? 16 MS. SPANN: There is one more. I wetlands and woods right there. So you get that 17 know he was waiting for me. natural instinct when you ride down there of a 18 country road and through the woods. So there is a MR. SCARPULLA: I have a comment. 19 20 Hi, Brian Scarpulla, 88 Halsey Reed Road, Cranbury. lot of things that that side of the road still has I just want to know if the master left. There isn't a lot of that left around 21 anymore but there is some. 22 plan circulation element has taken Monroe Township's ordinance to ban truck traffic into The other thing that I wanted to say 24 consideration? 24 is I hope that the planning board looks at it not 25 MR. PREISS: I'm not sure what you 25 to change to a medium-density industrial zone. I Page 90 Page 92 1 think the planning board can put an amendment into 1 mean. 2 the industrial light impact zone that would work MR. SCARPULLA: So Monroe Township 3 recently passed an ordinance to ban truck traffic 3 for the global retail, you know, distribution 4 on a couple of their roads leading into the centers that are there. And I would rather see 5 warehouse district in Cranbury. And I just want to that done than change it to medium, because I am 6 know if the circulation element has taken that into afraid that's going to open the door to not only consideration? what is there right now, but many other things that MR. PREISS: So I'm not going to you do not want. 8 9 comment on that particular policy. I'll leave it Keep it the light impact even though 10 for attorneys to deal with that. we got stuck with the traffic and try to work the But we're trying to deal with best you can with it. That's the only thing I can 11 12 traffic on a regional basis. So, you know, we're 12 13 trying to -- as I indicated before, we are now CHAIRMAN MAVOIDES: All right. 13 Thank you. 14 facing the reality of not having the bypass road 14 15 done and sending traffic south to Route 8. So it MR. DILLON: Thank you, gentlemen. 15 does take that -- it takes all traffic into BOARD MEMBER MULLIGAN: Thanks, Bob. 16 consideration that would be generated from the MR. PREISS: Thanks. 17 17

22 make things a lot worse.

25 the attorneys deal with that.

18

23

warehouse development in Cranbury.

20 is sustained and it's not allowed to go that way,

I, personally, don't think that

21 it's going to make things a lot -- it's going to

24 that's something that is legal to do, but I'll let

Certainly, if that happens and that

18

19

20

21

23

24

25

had --

right? Yeah, Steve.

MS. ROGERS: Barbara Rogers.

I was just curious, the list of

targeted farmland preservation farms, are you not going to include that? I know you meant like you

You just reminded me. It's Steve;

MR. PREISS: We're going to have to

			October 16, 2019
	Page 93		Page 95
	1 4 4 4 4	1	CERTIFICATE
	update that list.	2	
2	MS. ROGERS: Yeah, from the ag.	3	
3	development board.	4	
4	MR. PREISS: Right.	5	T MIGHELLE D WILLOW a Combined Count
5	MS. ROGERS: Yeah, okay.		I, MICHELLE D. WILCOX, a Certified Court
