

Cranbury Township Police Department
Announces the Addition of a Safe Medication Disposal Unit
in Police Headquarters

Chief Rickey A. Varga of the Cranbury Township Police Department would like to announce the addition of a new Safe Medication Disposal Unit located within the lobby of police headquarters. In conjunction with KidCents & The Rite Aid Foundation, a metal disposal unit mirroring a USPS Mailbox has been installed and is available for use weekdays, Monday through Friday from 8:30 am to 4:30 pm.

This disposal unit is set up to place unwanted or expired medications in the drop-box to help prevent dangerous accidents with the children in your household. Chief Varga commented, "If we are able to help and possibly stop an overdose of any kind due to leftover or expired medications, then it is worth its weight in gold. To invest in the safe keeping of Children in our Community is our greatest endeavor."

The accepted medications are any prescribed medications (Schedule II-V controlled and non-controlled substances) and any Over-the-counter medications. (Common dosage forms, such as tablets, capsules, ointments and patches.)

Unacceptable items are illegal drugs, needles, lotions or liquids, inhalers, aerosol cans, thermometers and hydrogen peroxide.
